

Performa Cream™ 2PE

Fully coated CTMP board with cream reverse

Performa Cream 2PE is a two-side polyethylene-coated GC2 board with a three-layer fibre construction and CTMP (chemi-thermomechanical pulp) in the middle layer. It is triple-pigment-coated on the top side, with transparent LDPE also on the reverse cream side. Performa Cream 2PE is also available hard-sized (HS).

Issued: 03.2024
Cancels: 12.2017

*) For 315 – 360 g/m²

**) For hardsized

All properties according to Fors Mill measurements from board machine production.
Laboratory test climate 23°C/50% RH (according to ISO 187).
Tolerances based upon 95% confidence limits, apply to delivered reel/pallet average.
Bending moment Taber 15° and Bending resistance L&W 15° are binding, Bending stiffness DIN 5° are indicative.
Bending moment Taber 15° calculated from Bending resistance L&W 15°.

Performa Cream™ 2PE

Fully coated CTMP board with cream reverse

Certificates

Quality management ISO 9001
Environmental management ISO 14001
Product safety FSC 22000
Occupational health and safety ISO 45001
Energy management ISO 50001

FSC and PEFC certified board available upon request.

Paperboard can be recycled

Key characteristics and main enduses

Performa Cream 2PE provides excellent value, runnability and performance in applications that require protection against humidity. The polyethylene coating on both sides provides excellent sealability in converting and protection against moisture. Performa Cream 2PE is typically used for frozen and chilled food products. Performa Cream has high brightness and whiteness on the top side for optimal visual appearance.

Storage recommendations

For optimal printing results, the moisture proof wrapping should not be removed until the board has reached the temperature of the press room.

Pallet/Reel Weight (kg)	Difference in temperature between board and press room (press room temp. approx. 20°C)		
	10°C	20°C	30°C
400 kg	2 days	2 days	3 days
800 kg	2 days	3 days	4 days
1200 kg	2 days	4 days	5 days

The product properties, according to the specifications, are guaranteed for 12 months after the production date. In order to ensure product safety, the product must be well wrapped and stored in its original cover indoors, sheltered from rain and snow. The recommended storage conditions are 50–55% relative humidity and 20–23°C.

For the Corona treatment, we recommend using the board within 12 months of the production date; after this period, the treatment level should be tested before printing or gluing.
